

transformToTestObjWrapper() Method

This method transforms given test list of {@code TestEecutable} type into {@code TestObjectWrapper} type list. This method can not transform test cases outside current package, so those test cases will be omitted from the list.

- * 1. If XML testScript is provided then use it
- * 2. If user has provided testList using main() method then use it
- * 3. If all of the above is not provided then use reflection to find test cases
